An evolution of sleep apnea therapy.

The Dream Family is a comfortable user-driven innovation that helps you get the sleep you need. Imagine lying in bed, reading or watching TV with nothing blocking your view. Imagine turning on your side, dozing off, rolling over and sleeping on your stomach—all while treating your sleep apnea. Now, you don’t have to imagine it. You can do it. Because we made the Dream Family user-friendly in every possible way.

Sleep tip

Most people begin to feel better within the first week of use, though for some people it may take a little longer.

We dream of sleep.

At Philips Respironics, we know that good, sound sleep is vitally important at every age—to your work, your play, your physical and emotional well-being. That’s why we designed the Dream Family to help make treating your sleep apnea easy and comfortable. So you get the kind of sleep you need to help you feel more like yourself every day.

Comfort

From feel to function to airflow.

Patient driven

700 interviews and trials*

Remarkable ease

User-friendly interfaces.

You’re in control.

Stay motivated, get results.

See how the entire Dream Family can benefit you.
DreamWear
The closet thing to wearing no mask at all.*

The open-face design provides superb comfort, allowing freedom of movement and the ability to choose your most comfortable sleep position.

› Users rate DreamWear more comfortable, more stable, easier to use and more appealing than their prescribed mask.*

› Unique in-frame air-flow and an innovative air tube connection at the top of head.

› Light, soft, and flexible material.

Sleep tip
The tubing is used to carry the air from the therapy device to the mask. You should clean and inspect your tubing at least once a week to make sure it is clean, pliable, and free of tears. If you think your tubing is ready for replacement, contact your homecare provider.

*2015 User Preference Questionnaire, data on file
DreamStation
Making sleep therapy simple, quiet and smart.

With easy-to-navigate menus, a sleek, compact design and quiet operation, DreamStation helps make it simple to start, customize and continue your obstructive sleep apnea (OSA) therapy.

› Controls and interface at the front of the unit for enhanced visibility on your nightstand.

› Colorful, easy-to-use display with icon-based navigation and daily feedback.

› Most comprehensive suite of connectivity options available among the leading CPAP brands.*

Sleep tip
Humidifiers are designed to moisturize the air that is being delivered to you from the therapy device. There are two types of humidifiers—heated and unheated. Heated humidifiers do not “heat the air” but will increase the moisture content of the air delivered. Humidifiers can help to reduce some of the side-effects of therapy, such as dry nose.

DreamMapper
Stay motivated to take charge...

As a mobile app and online software, DreamMapper helps keep you motivated to take charge of treating your sleep apnea.

› See daily feedback on your progress
› Set and track custom goals, and unlock achievements.
› Find guidance and informational videos to help you stay committed.
› Receive notifications about your therapy and DreamMapper compatible* equipment.

Sleep tip
Snoring while on CPAP should not occur. If it does, contact your doctor. Your pressure level might need to be adjusted.
